## Meter Reading Software Advancing

Foresthill continues to work hard at advancing the meter reading process for our community. Temetra, the new drive-by meter reading software, refers to gathering meter information by simply driving by the meter instead of taking a manual reading. This technique employs GPS coordinates along with a wireless network to automatically collect data.

An example of a water hammer happening is when a home faucet, sink, shower, or water tap is turned off too quickly. This can result in the rattling of the water pipes. The water hammer can happen on a larger scale. For example, if the water flow suddenly alters from a fire hydrant. The shock waves from the water hammer can damage pipes, connections, and fittings, which can lead to leaks.

## Next Foresthill Meeting

Foresthill Elementary School  
Wednesday, March  
12th, 2025  
at 6:00 P.M

Check your Foresthill website for an agenda which will be posted 72 hours before the meeting.

## Water fun fact

A cow must drink 4 gallons of water to make 1 gallon of milk.

## Reservoir Updates

Rain Totals for the calendar year 2025 = 16.89"  
Average year +/- 49"

Storage = 7,050 Acre Feet

1/24/25 - 2/20/25 Usage = 26.15 Acre Feet

Reservoir currently 102% full

## Foresthill is Special

The Foresthill Public Utility District was formed in 1950. We are one of many Special Districts in Placer County. Special districts stand out because they are dedicated professionals offering specialized services at the request of the voters in their area. Special districts are created and funded by a community's residents to provide new or enhanced local services and infrastructure. Nearly every one of California's 39 million residents receives at least one essential service from California's 2,000 independent special districts. — CSDA
